# NOBLE STONE

*Quartz Collection*

*[www.noblestone.uk](http://www.noblestone.uk)*

# Our Features

Our surfaces are crafted to the highest manufacturing standards, using advanced production technology and premium-grade raw materials. Each slab is carefully selected ensuring exceptional durability, consistency, and beauty.

## IMPACT RESISTANT:

Contains small quantities (7-10%) of resin as adhesives and is therefore highly resilient - around 10 times stronger than natural rock and ceramic surfaces.

## PRODUCT VARIETY:

With extensive stock availability and a carefully curated collection of surfaces, the customer is offered an impressive spectrum of colours and finishes.

## ANTIBACTERIAL:

The pore-free quartz prevents stains and any bacteria and germs from multiplying, making it safe for human environments.

## HEAT RESISTANT:

Our quartz slabs are heat resistant, featuring an A1-rated fire-resistant surface that helps preserve their appearance under high temperatures.

## STAIN RESISTANT:

Water absorption rate of less than 0.03%, makes it easy to clean any spilled liquids, even stubborn ones such as wine, coffee and turmeric.

## SCRATCH RESISTANT:

Having a hardness of 7 on the Mohs scale, it is impenetrable to most materials other than rare gems such as diamonds, topaz, and quartz.

## EASY TO CLEAN:

Only needs to be wiped with a damp towel and any common surface cleaner to clean up, no special maintenance requirements.

## ACID & ALKALINE-PROOF:

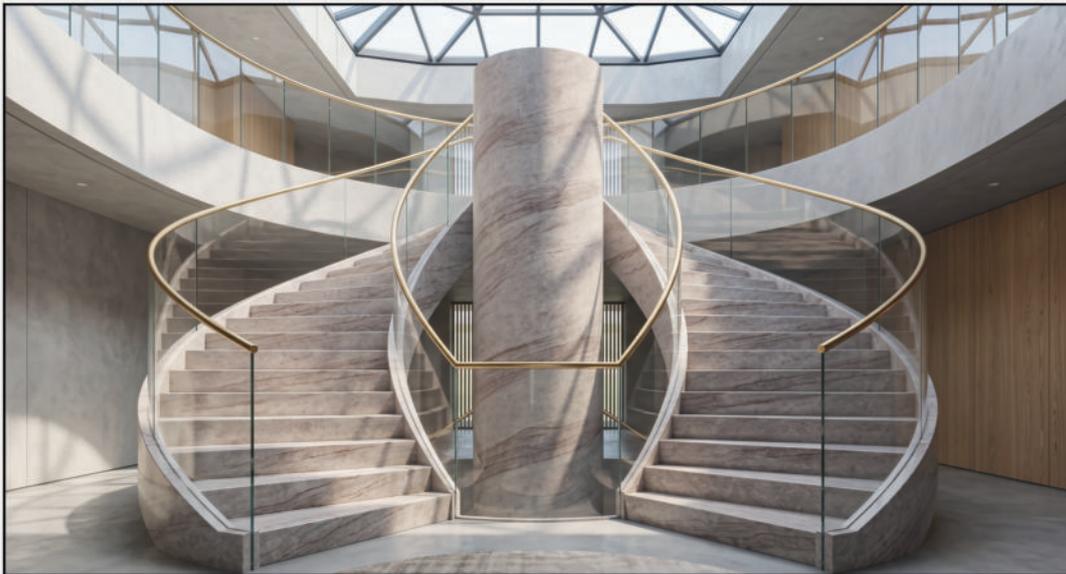

Naturally resistant to acids and alkaline, which means you can use any surface cleaner on the market.

# UNLIMITED APPLICATIONS

Our collections present a remarkable spectrum of design possibilities — from the timeless elegance of Calacatta colours to the classic sophistication of Travertine, to the striking brilliance of 3D Quartz. Each chosen for its beauty, durability, and architectural presence. Every surface we offer is designed not simply to function, but to elevate spaces with refinement and distinction.
